Project Title -

Infollege

Problem Statement -

Online education in present time is very unorganized/scattered, one needs different platforms/software for different tasks, our product aims to provide all in one solution to online education for both students as well as teachers.

TASK -The user wants to know about the upcoming quizzes and assignments and wants to register for a particular event in the upcoming intra-college fest.

(**Turquoise** Arrows represent the way he knows about the quizzes and assignments and **Red** Arrows represents the way he registers for a particular event in the upcoming intra-college fest)
