Features

Our app will support the ability to sort assignment deadlines in increasing order of their submission time.

Infollege notifies the user about the meet link.

Infollege could notify the student about his class timings prior to him going to bed.

Infollege directs the student to the portal where the quiz is to take place.

An inbuilt calendar application will enable students to know about various club activities and sessions happening this week.

A system where if his connection dropped in between uploading the assignment and turning it in would still enable the TA to access his uploaded assignment.

An auto-save feature will be present whenever students upload their assignments but weren't able to submit them due to connectivity issues.

Inbuilt exam organising portal instead of a third party.

Problems

What if one was oblivious to his class timings today?

What if the user isn't able to turn in the assignment due to network issue ?

Other apps make it very tedious to conduct exams on various platforms.

Finds its time consuming to keep track of students' grades in various exams conducted on various examination portals.

Different courses take quizzes/homework submissions on different platforms.

It is a tedious task to use different apps for different purposes.

Classes links are often changed and the user struggles to find the new links.

Teacher wants a communication portal through which she could broadcast any upcoming research opportunities on campus to all students so that interested students could apply.

Solutions

It would show the relevant lecture links without any jargon.

A pop-up would come 10 minutes prior to the lecture in the user's phone from infollege prompting him to join.

It presents all the club activities in accordance with their time of conduct.

The list of due quizzes in order of when they are supposed to be conducted would be accessible by him.

Any prerequisites to attend any session would also be clearly stated in our app.

A notification would be sent to him in the morning regarding his due assignments for today.

A multipurpose app that combines all features like online classes, exams, homework submissions in one place.

To have a platform for resolving any academic queries as fast as possible.

A single platform on which one could conduct exams easily and also keep track of students' grades.
(from teachers pov)

Possible future updates

An option of a personal voice assistant which would give verbal notifications

Optimize memory space occupied by the app in the respective devices.
